

COMPETITOR RESEARCH & IDEAL CLIENT PROFILES

3 Competitors + 3 ICPs — Nuno Tavares Manus AI Webinar

Final Project — Pareto Talent AI Bootcamp | April 2026 | Juan Balbusso

PART 1 — COMPETITOR RESEARCH

Three direct competitors analyzed in the AI/no-code education space. Selection criteria: live or structured training, non-technical audience targeting, AI agent focus, business-outcomes positioning.

Competitor 1 — HighLevel Official AI Expert Coaching

gohighlevel.com/advanced-ai-training

Website Structure

Hero	Bold claim: 'AI Isn't The Future. It's Happening Right Now.' + single CTA
Social Proof	\$53M+ revenue, 103K+ customers, 70K+ businesses — authority by numbers
Curriculum	5 pillars: AI Employee, Prompting, AI Sales, Sales Psychology, Marketing AI
Expert Roster	6 named coaches with headshots, credentials, assigned session days
CTA	'Sign Up Now' repeated throughout — no pricing visible on page

Value Proposition & Pricing

- 9-week live Q&A coaching program with rotating expert coaches
- Covers AI employees, prompting mastery, sales scripts, behavioral psychology, agency GTM
- Pricing: HIDDEN — premium positioning, requires sign-up to access pricing
- Target: existing GoHighLevel agency owners and SaaS resellers — NOT beginners

- Authority: coaches with \$52M+ in sales, Two Comma Club Awards, 70K businesses served

Messaging & Ad Style

Pain Points & Ad Patterns

Pain: 'Are you keeping up with AI or falling behind?' — FOMO and competitive urgency

Pain: 'Sell AI services with confidence' — targets people who struggle to close deals

Style: Authority-first — massive numbers before any content promise

Style: Multi-expert credibility — 6 coaches vs one personal story

Style: GHL-specific — assumes prospect already uses GoHighLevel

Gap: No personal story, no beginner pathway, no free entry point

✓ Nuno's Advantage vs Competitor 1

- Personal story: 25-year journey resonates — GHL coaches have zero narrative
- Manus AI specific: laser-focused vs broad 9-week AI overview
- Non-technical audience: GHL assumes agency background — Nuno starts from zero
- 3 days vs 9 weeks: dramatically lower commitment barrier
- Free registration: zero financial risk vs hidden premium price

Competitor 2 — Manus Academy (Official Platform)

academy.manus.im — Built and operated by Manus (the company)

Website Structure

Hero	Simple welcome + tagline about business results — minimal sales copy
Trending Posts	News feed of Manus feature updates and announcements
Events	Fireside chats, GTM workshops, live demos with external partners
Projects	Community-built Manus projects — social proof of member builds
Community Feed	Activity stream of member posts — forum-style interaction

Value Proposition & Pricing

- Official Manus education hub — free community membership model

- No structured curriculum — community browsing + events only
- Focus: Business Analysis, Product Management, Finance/Private Equity
- Target: more technical users, developers, PMs, enterprise professionals
- Pricing: FREE to join — no course fees, event-based access

Messaging & Ad Style

Pain Points & Ad Patterns

Pain: 'Stay current with Manus updates' — feature-update heavy, not outcome-heavy

Pain: 'Apply Manus to practical business scenarios' — assumes some prior knowledge

Style: Informational — reads like product documentation with community layer

Style: No emotional hook, no urgency, no conversion optimization whatsoever

Gap: Feels like a developer hub — not accessible to non-technical business owners

✓ Nuno's Advantage vs Competitor 2

- Nuno teaches HOW to use Manus for business — Manus Academy teaches WHAT Manus does
- Structured 3-day curriculum vs unstructured community browsing
- Human teacher with credible transformation story — completely absent in Manus Academy
- Real urgency: live dates, limited seats, specific outcome promised by Day 3
- Built for non-technical professionals — Manus Academy skews developer/PM

Competitor 3 — Udemy AI Agents No-Code Courses

udemy.com/course/no-code-ai-agents | udemy.com/course/n8n-course

Website Structure

Hero	Course headline + star rating + enrollment count + instructor name
Outcomes	Bulleted skill list promised on completion — specific and transparent
Curriculum	Full accordion visible before purchase — maximum pre-purchase clarity
Instructor	Technical credentials: years coding, degree, agency background
Social Proof	Student count, average rating, recent reviews
Pricing	List price crossed out + sale price + 30-day money-back guarantee

Value Proposition & Pricing

- Self-paced video courses — fully asynchronous, no live interaction
- Flowise: 'Build Powerful AI Agents. Zero Coding Required!' — visual workflow builder
- n8n: RAG, voice agents, multi-agent systems, AI automation — more advanced
- Pricing: \$15–\$20 on sale (list \$84–\$199) — very low financial barrier to entry
- Includes: downloadable resources, Q&A forum, certificate, lifetime access
- Audience: broadest possible — beginners, professionals, managers, entrepreneurs
- Known weakness: <10% course completion rate industry-wide

Messaging & Ad Style

Pain Points & Ad Patterns

Pain: '2026 is the year of AI Agents — don't get left behind' — pure FOMO

Pain: 'Don't lose your job to AI' — fear of obsolescence as primary motivator

Style: Tool-centric — sells the platform (n8n, Flowise) not the transformation

Style: Price anchoring — high list price crossed out to create value perception

Style: Heavy social proof via student counts and star ratings

Gap: No live interaction, no accountability, no community, no personal relationship

✓ Nuno's Advantage vs Competitor 3

- Live and interactive: real-time Q&A vs passive video with no accountability
- Business outcomes vs tool mastery: how to RUN your business with Manus vs how to use features
- Personal relationship: Nuno builds rapport over 3 days — Udemy is transactional
- Manus AI 2026: the hottest AI agent tool right now — not legacy n8n/Flowise
- Free entry: zero risk vs paying upfront for content you may never finish
- Completion accountability: live format drives commitment — Udemy averages <10% completion

Master Comparison Table

Criteria	GHL Coaching	Manus Academy	Udemy	✓ Nuno's Webinar
Format	9-wk live Q&A	Community hub	Self-paced video	3-day live webinar
Price	Hidden premium	Free	\$15–\$20 sale	🎉 FREE
Audience	GHL agency owners	Developers/PMs	Broad beginners	Non-technical pros
Tool focus	GHL AI features	Manus platform	n8n / Flowise	Manus AI 2026
Personal story	✗ None	✗ None	✗ None	✓ 25yr journey

Criteria	GHL Coaching	Manus Academy	Udemy	✓ Nuno's Webinar
Live interaction	✓ Yes	Events only	✗ No	✓ Yes (3 days)
Urgency	Low	None	Artificial	✓ Real live dates
Outcome focus	Agency scaling	Feature mastery	Job security	Build 1st AI agent

🎯 Key Copy Angles from Gap Analysis

"The only live training that shows non-technical professionals how to build their first AI agent — for free"

"Every competitor teaches software. Nuno teaches you how to run your business with it."

"3 days. Your first AI agent. No code. No theory. Just results."

"Nuno built a 6-figure business working nights and weekends. Now he's giving you the shortcut."

PART 2 — IDEAL CLIENT PROFILES (ICPs)

Three profiles developed by cross-referencing: Nuno's existing audience, the gaps in competitor targeting, and the specific promise of the Manus AI webinar. Each ICP has a distinct entry point, pain stack, and messaging angle.

ICP 1 — The Trapped Corporate Professional

"I know AI is changing everything. I just don't know where to start — and I'm scared of being left behind."

Demographics

Persona	Marcus, 38 years old
Job Title	Operations Manager / Senior Project Manager / Corporate Middle Manager
Location	US, Canada, UK, Australia — mid-to-large cities
Income	\$65,000–\$110,000/year salary — stable but capped with no clear path up
Education	Bachelor's degree in business, marketing, or management — non-technical
Tech comfort	Uses Excel, Slack, Zoom, maybe a CRM — not a builder, not a developer
Work situation	45–55 hrs/week, 1–2 hr commute or hybrid, feels stuck in repetitive cycles

Family

Often married with kids — financial responsibilities create risk aversion

Pain Points

- Watches colleagues get promoted for 'knowing AI' while he still does things manually
- Has tried ChatGPT but doesn't know how to apply it to real work outcomes
- Feels like every AI tool is built for developers — not for people like him
- Hears 'AI agents' everywhere but has no idea what that actually means in practice
- Scared to invest in expensive courses that turn out to be too technical or theoretical
- Has a side hustle idea but feels paralyzed by 'not being technical enough'

Goals & Desired Outcomes

- Understand what AI agents are and build at least one real working example
- Automate repetitive tasks at his current job — buy back 5–10 hours per week
- Build credibility as someone who 'gets AI' — promotable, valuable, future-proof
- Explore whether he can eventually build a side income using these tools
- Learn without needing to code, have a CS degree, or spend weeks studying

Why This Webinar Is Perfect for ICP 1

- Free entry removes his biggest objection: 'What if it's not actually for me?'
- Live format creates accountability — he shows up and completes vs Udemy passivity
- Nuno's personal story mirrors his situation: corporate professional who found the way out
- 3 hours total across 3 days fits his schedule without overwhelming his family life

🎯 Messaging Angle — ICP 1

Hook: "You don't need to code. You don't need a tech degree. You just need 3 hours and the right teacher."

Angle: Transformation + accessibility — specifically built for non-technical professionals

Fear address: "I've seen people like you build their first AI agent on Day 1. The tech isn't the barrier. The decision is."

Nuno mirror: His 25-year corporate story speaks directly to Marcus — same background, different outcome

CTA: "Reserve your free seat before April 27 — and finally understand what everyone is talking about"

ICP 2 — The Struggling Solopreneur / Small Business Owner

"I'm wearing every hat in my business. I know I need to automate — I just don't know how."

Demographics

Persona	Sandra, 42 years old
Business type	Coach, consultant, freelancer, real estate agent, or local service business owner
Location	US, Canada, Latin America, UK — predominantly English-speaking markets
Revenue	\$3,000–\$15,000/month — generating income but nowhere near efficiently
Team size	Solo or 1–2 VAs — heavily dependent on herself for everything
Tech comfort	Uses Canva, Zoom, Instagram, basic email tools — not a systems builder
AI exposure	Has played with ChatGPT, maybe tried one automation but got overwhelmed and quit
Pain moment	Loses leads because she can't follow up fast enough — works evenings to catch up

Pain Points

- Spends 3–4 hours/day on tasks she knows could be automated — but doesn't know where to start
- Has looked at Zapier or Make.com but found them confusing or too technical
- Loses potential clients because her follow-up is slow or inconsistent
- Can't afford to hire another person but also can't keep scaling herself alone
- Doesn't trust AI tools will actually work for her specific type of business
- Every 'automation guru' course costs \$500–\$2,000 and doesn't speak her language
- Always playing catch-up — reactive instead of proactive in her own business

Goals & Desired Outcomes

- Automate lead follow-up, appointment booking, and client onboarding — the 3 biggest time drains
- Build an AI agent that works for her while she sleeps — passive client acquisition
- Free up 10+ hours per week to focus on delivery and growth, not admin

- Understand AI well enough to make smart buying decisions about tools going forward
- Grow revenue without growing workload — the ultimate solopreneur dream

Why This Webinar Is Perfect for ICP 2

- Manus AI directly solves her biggest business problems — not a generic AI overview
- Nuno's positioning as a business builder (not a tech teacher) resonates with her operator mindset
- VIP upsell at \$97 is within her budget and the ROI is immediately obvious
- Live format matches her learning style — she learns by watching someone do it in real time

Messaging Angle — ICP 2

Hook: "What if your business could follow up with every lead, book every appointment, and send every email — without you lifting a finger?"

Angle: Time freedom + revenue without extra hours — the solopreneur dream

Pain mirror: "You didn't start your business to become its most overworked employee."

Outcome promise: "By Day 3, you'll have a working AI agent handling the tasks that are stealing your evenings."

VIP pitch: "The VIP tier is for people who want to implement this immediately — not just understand it."

CTA: "Join free. Watch it work. Decide what to do with 10 extra hours a week."

ICP 3 — The Agency Owner / Marketing Consultant

"My clients are asking about AI agents. I need to be the expert — before my competitors beat me to it."

Demographics

Persona	David, 35 years old
Business type	Digital marketing agency, GoHighLevel reseller, marketing consultant, SMMA owner
Location	US, UK, Canada, Australia, Latin America
Revenue	\$10,000–\$50,000/month — established business, looking for new revenue streams
Team size	2–8 people — has some structure but still deeply involved in delivery

Tech comfort	Comfortable with GHL, Zapier, Meta Ads, basic automations — not a developer
AI exposure	Knows the terminology, has tried some tools, wants structured implementation training
Opportunity	Sees AI agents as a new high-ticket service (\$1,500–\$5,000) to sell to clients

Pain Points

- Clients are asking 'can you build us an AI agent?' and he doesn't have a confident answer yet
- Knows enough to know he's behind — competitors are already offering AI services
- Has seen Manus AI content online but found no structured business deployment training
- Most AI training is either too basic (ChatGPT tips) or too technical (requires coding)
- Needs to upskill quickly without taking weeks away from client delivery
- Wants to add AI agent builds as a new service but needs to actually know how to deliver
- Risk of losing retainer clients to competitors who can offer full AI automation packages

Goals & Desired Outcomes

- Add Manus AI agent building to his service offering within 30 days of the webinar
- Understand how to deploy agents for client use cases: lead gen, follow-up, onboarding, support
- Position himself as the AI expert in his market — authority and differentiation
- Find a mentor and community in the AI agent space (Nuno's full ecosystem)
- Potentially become a referral partner or affiliate — high lifetime value relationship with Nuno

Why This Webinar Is Perfect for ICP 3

- Most likely VIP buyer — immediately sees ROI in the form of new billable services
- Nuno's HighLevel background is a direct trust signal — they speak the exact same language
- The webinar gives him enough to have intelligent client conversations starting Day 1
- Nuno's full ecosystem (Arcytex, Automated Marketer, consulting) is a natural upsell path

Messaging Angle — ICP 3

Hook: "Your clients are already Googling 'AI agents.' The question is whether they find you or your competitor first."

Angle: Competitive urgency + new revenue stream — business growth, not just skill building

Authority build: "Nuno has built AI systems for agencies generating \$100K+ months. This is what he's teaching."

Outcome: "In 3 days, you'll know how to build, pitch, and deliver Manus AI agent services to clients."

VIP pitch: "The VIP tier includes the exact frameworks Nuno uses with his own agency clients — pays for itself on your first project."

CTA: "Reserve your free seat now. Stay for VIP if you want to monetize what you learn."

ICP Quick Reference Summary

	ICP 1 — Marcus	ICP 2 — Sandra	ICP 3 — David
Type	Corporate Professional	Solopreneur / SMB Owner	Agency Owner / Consultant
Age	35–45	38–50	28–42
Income	\$65K–\$110K salary	\$3K–\$15K/mo revenue	\$10K–\$50K/mo revenue
Primary fear	Being left behind by AI	Drowning in admin work	Losing clients to competitors
Primary goal	Future-proof career	Automate to scale	Add AI to service offerings
VIP likelihood	Medium	High	Very High
Best hook	Accessibility + transformation	Time freedom + automation	Revenue + competitive edge
