

# FINAL PROJECT — PROCESS LOG

## Pareto Talent AI Bootcamp

3-Day Manus AI Webinar Launch for Nuno Tavares  
Juan Balbusso • April 2026 • Deadline: April 15, 11:59 PM ART

## Project Task Tracker — Final Status

Updated: April 15, 2026 | Submission day

| Task   | Description                                                                     | Status     | Score |
|--------|---------------------------------------------------------------------------------|------------|-------|
| Task 1 | AI Knowledge Base — ClickUp, voice profile, 3 competitors, 3 ICPs, Google Drive | ✔ Complete |       |
| Task 2 | Website & Funnel — 3-page funnel live on Lovable (/ , /vip, /thankyou)          | ✔ Complete |       |
| Task 3 | CRM & Automations — 3 workflows, 12 emails, pipeline, all tested in GHL         | ✔ Complete |       |
| Task 4 | Marketing — 3 Facebook ads, Day 1 webinar deck (Gamma), Video ad                | ✔ Complete |       |
| Task 5 | Loom Video — project presentation to Nuno                                       | ✔ Complete |       |

## About This Document

This is the living process log of the Final Project. Every step is documented in real time — what was done, which tools were used, and why each decision was made.

### 3-Layer Documentation System

Layer 1 — Detailed Reference Docs: Competitor Research + ICP doc, Lovable master prompts (Google Drive)

Layer 2 — This document: step-by-step process log with summaries, reasoning, and links to all resources

Layer 3 — Final Visual Presentation (Gamma): image-heavy summary deck + Loom video for Nuno

## Task 1 — AI Knowledge Base & Project Management

Date: April 11, 2026

### 1.1 — Nuno Tavares Research & Voice Profile

Before building anything, I needed to understand who Nuno is — his voice, his story, his communication style, and how he connects with his audience. Research sources:

- Website, social media profiles, course pages, and student testimonials
- 2 full YouTube transcripts analyzed — see thumbnails below

"If Your Life Was a Movie" — voice, storytelling, and audience connection analyzed

"I Quit My 9-5 After 25 Years" — personal narrative, key phrases, and tone extracted

#### Voice profile built:

- Direct, honest, story-driven — leads with personal experience before teaching
- Catchphrases: "Let's freakin' go", "And I got to be honest", "Consistency beats intensity. Every. Single. Time."
- Teaching style: starts with his own mistakes, gives real numbers, empowers non-technical people
- Avoid: generic AI slop, vague promises, corporate filler language, purple gradients on white

---

### 1.2 — Competitor Analysis

3 competitors analyzed using Meta Ads Library research, website audits, and course page reviews:

- HighLevel AI Expert Coaching — hidden premium pricing, GHL-specific audience, good authority but limited to one platform

- Manus Academy — free community hub, no structured curriculum, no completion accountability
- Udemy AI Agent Courses — self-paced, fear-based marketing, under 10% completion rate industry average

Strategic positioning: Nuno wins on LIVE implementation, real-world templates, and a credible personal brand that competitors cannot replicate.

---

### 1.3 — 3 Ideal Client Profiles

- Marcus, 38 — Corporate Professional: wants internal credibility, fears wasting time on tools that don't work
  - Sandra, 42 — Solopreneur: wants to automate her business, fears technical complexity she can't manage alone
  - David, 35 — Agency Owner: wants to add AI services to his offer stack, fears being left behind by competitors
- 

### 1.4 — ClickUp Project Management

Full project breakdown created in → [ClickUp — Pareto FP space](#). Structure:

- 5 Milestone folders (one per task)
- 11 task lists
- 70+ tasks with due dates, priorities, and subtasks

ClickUp — Milestone folder structure across all 5 deliverables

---

## Task 2 — Website & Funnel

Date: April 12–13, 2026

### 2.1 — Grand Slam Offer (Hormozi \$100M Framework)

The offer was built using the 4-variable framework: Dream Outcome, Perceived Likelihood, Time Delay, and Effort & Sacrifice. Every element is strategic — each bonus solves a specific ICP objection.

#### **Free Offer — Total Value \$1,185 → Price: FREE**

3-Day Live Webinar (\$497) + Quick-Start Playbook (\$97) + 3 AI Templates (\$197) + Hot Seat Q&A (\$297) + 7-Day Replay (\$97)

Guarantee: "The No-Wasted-Hour" — if no working agent by Day 3, Nuno does a 1-on-1 fix session

#### **VIP Upsell — Additional \$988 value → Price: \$97 (50 seats)**

Priority front-row seating (\$197) + VIP Day 4 Implementation Session (\$297) + GHL + Manus Template Pack (\$397) + Community 1 month (\$97)

### 2.2 — Design System

Consistent brand system applied across all 3 pages:

- Background: #050d1a (navy) / #0a1628 (mid) / #0f2040 (light)
- Accents: #00d4ff (cyan) / #00f5c4 (teal) / #e91e8c (magenta) / #ffd700 (gold for VIP)
- Typography: Bebas Neue (display) + Barlow Condensed 900 (titles) + Barlow 400 (body)
- HTML preview built before Lovable — validates design and saves credits before committing

→ [Claude chat](#) — design process session where brand assets and palette were established

## 2.3 — 3-Page Funnel Built in Lovable

- / Landing Page: 7 sections, live countdown timer, GHL form embed, YouTube main video + 3 Shorts, Nuno photos, sticky nav + CTA bar
- /vip VIP Page: Congrats banner, Free vs VIP comparison table, 4 bonus cards, floating VIP card animation, GHL survey embed, skip link to /thankyou
- /thankyou Thank You Page: Animated checkmark, event details card, Google Calendar links (all 3 days + VIP Day 4), next steps checklist, VIP pass, social share buttons

Master prompts generated for all 3 pages. Full master prompt for the landing page stored in Google Drive (link in key resources section).

## Task 3 — CRM & Automation Workflows

Date: April 13–14, 2026 | Platform: HighLevel (Bootcamp 6 FP sub-account)

### 3.1 — Pipeline Setup

→ [GHL Pipeline](#) — Manus AI Webinar April 2026 — 5 stages

- 🟡 Registered (Free) — assigned on form submit via Workflow 1
- 💎 VIP Purchased — assigned on VIP survey submit via Workflow 2
- ✅ Attended — tag-based, fires April 27 at 4:00 PM CST
- 🔥 No Show — IF/ELSE check: no attending tag by 5 PM → No Show stage
- 🏆 Converted / Closed — manually managed post-webinar

Note: Nurture Active stage was dropped — Registered (Free) already implies nurture is active. Redundancy removed.

### 3.2 — Workflow 1: Free Registration

→ [Workflows](#)

Trigger: Form Submitted — Form is any of "Form - Juan Balbusso"

**Add Tag** → `juan_balbusso-regist`

**Remove Tag** → (removes conflicting tags from shared environment)

**Create Opportunity** → Pipeline: Registered (Free)

**Internal Email 1** → New Free Registration (immediate notification to you)

**Email 1** → Thank You + Confirmation (immediate, sent to registrant)

**Wait** → 1 hour

**Hype Email** → 3-day agenda email

**Set Event Start Time** → GHL event anchor for relative date calculations

**Wait — 2 days before** → waits until April 25

**Reminder (April 25)** → 48-hour reminder before the webinar

**Wait** → until April 27 at 1:00 PM CST

**Email — Launch Day** → Day 1 starts in 2 hours

**Wait** → until April 28 at 1:00 PM CST

**Email — Day 2** → Day 2 starts in 2 hours

**Wait** → until April 29 at 1:00 PM CST

**Email — Day 3** → Final session starts in 2 hours

**END**

**⚠ Testing Note — Shared Environment**

Emails initially hit sending limit due to shared GHL sub-account with multiple bootcamp students — NOT a workflow error

After waiting, both emails received successfully (landed in spam — expected with shared sending domain mail.optmastery.com)

2 extra tags from other students' unfiltered workflows appeared on test contact — NOT from our workflow (our trigger correctly filters to Form - Juan Balbusso only)

Workflow logic confirmed correct — issues are shared environment limitations

---

### 3.3 — Workflow 2: VIP Purchase

Trigger: Survey Submitted — Survey is any of "VIP - Juan Balbusso"

**Add Tag** → `juan_balbusso-vip`

**Remove Tag** → `juan_balbusso-regist` (removes free tag — contact moves to VIP)

**Update Opportunity** → Pipeline stage: VIP Purchased

**Remove from Workflow** → removes contact from the Free Registration Workflow

**Internal Email 1** → New VIP Registration (immediate notification to you)

**Email VIP** → Thank You + Confirmation (immediate, VIP-specific version)

**Wait** → 1 hour

**Hype Email** → 3-day agenda (same as free workflow)

**Set Event Start Time** → GHL event anchor for relative date calculations

**Wait — 2 days before** → waits until April 25

**Reminder (April 25)** → 48-hour reminder

**Wait** → until April 27 at 1:00 PM CST

**Email — Launch Day** → Day 1 starts in 2 hours

**Wait** → until April 28 at 1:00 PM CST

**Email — Day 2** → Day 2 starts in 2 hours

**Wait** → until April 29 at 1:00 PM CST

**Email — Day 3** → Final session starts in 2 hours

**END**

### 3.4 — Workflow 3: Remarketing

Trigger: Same form as Workflow 1. Fires in parallel. Targets free registrants who have NOT purchased VIP.

1. **Wait** → 24 hours after registration
2. **Condition** → Date branch check:
  -  **Branch** — IF current month is before April OR (current month IS April AND current day is before 27) → Continue
  -  **None** (conditions not met) → Remove from Workflow → **END** (*event started, VIP closed*)
3. **Condition** → Tag check:
  -  **Branch** — IF Tags does NOT include `juan_balbusso-vip` → Send **REMARKETING EMAIL 1**
  -  **Branch** — IF Tags INCLUDES `juan_balbusso-vip` → Remove from Workflow → **END** (*already bought VIP*)
  -  **None** (no conditions met) → **END**

#### SECOND LOOP — Email 2:

4. **Wait** → 48 more hours
5. **Condition** → Same date branch check as Step 2:
  -  **Branch** — Date still before April 27 → Continue
  -  **None** → Remove from Workflow → **END**
6. **Condition** → Same tag check as Step 3:
  -  **Branch** — No VIP tag → Send **REMARKETING EMAIL 2**
  -  **Branch** — Has VIP tag → Remove from Workflow → **END**
  -  **None** → **END**

#### Edge case solved — date protection:

Problem identified: if someone registers 1 day before April 27, the 24-hour wait fires on event day when VIP is already closed. Sending a VIP upsell email when VIP is unavailable is confusing and unprofessional.

Solution: custom date-branch condition exits the workflow automatically if current date ≥ April 27. Two-layer protection:

- Layer 1 — Date check: exits if month = April AND day  $\geq$  27 (or any month after April)
- Layer 2 — Tag check: exits if contact already has tag juan\_balbusso-vip (already bought)

#### ✓ Technical Achievement

This date-branch logic demonstrates advanced GHL automation thinking — handling edge cases most students would miss

Two sequential IF/ELSE conditions protect every possible registration timing scenario

Result: zero bad experiences for any contact segment regardless of when they register

### 3.5 — Email Sequence (11 Emails Total)

All 12 emails written in Nuno's voice and formatted visually for email clients (bold headers, emoji anchors, section dividers, clear CTAs):

| #  | Email                             | Workflow        | Timing                 |
|----|-----------------------------------|-----------------|------------------------|
| 1  | Internal — New Free Registration  | Workflow 1      | Immediate              |
| 2  | Internal — VIP Purchase Alert     | Workflow 2      | Immediate              |
| 3  | Thank You + Confirmation          | Workflow 1      | Immediate              |
| 4  | VIP Welcome + Content Delivery    | Workflow 2      | Immediate              |
| 5  | Hype Email (3-day agenda)         | Workflows 1 & 2 | Wait 1 hour            |
| 6  | Reminder — 48 hours before        | Workflows 1 & 2 | April 25, 10 AM CST    |
| 7  | Launch Day — Day 1 (2hrs before)  | Workflows 1 & 2 | April 27, 1 PM CST     |
| 8  | Day 2 Reminder (2hrs before)      | Workflows 1 & 2 | April 28, 1 PM CST     |
| 9  | Day 3 Final Session (2hrs before) | Workflows 1 & 2 | April 29, 1 PM CST     |
| 10 | Remarketing 1 — Soft Nudge        | Workflow 3      | 24h after registration |
| 11 | Remarketing 2 — Hard Urgency      | Workflow 3      | 72h after registration |

## Task 4 — Marketing Materials ✓

Date: April 14–15, 2026

## 4.1 — Facebook Ads (3 Ads)

Research: Meta Ads Library searched for active ads in webinar/AI/coaching space to identify best practices. Key findings: dark backgrounds, large text overlays, short punchy copy, one clear CTA, specific dates and numbers, pain-point or authority hook in first line.

3 ads created — each targeting a different ICP with a different psychological angle.  
AI-generated images from ChatGPT used as base visuals, then combined with brand overlays and copy:

Ad 1 — Authority Angle · "25 Years of Experience. 3 Days to Change Yours." · Targets Corporate Professionals (Marcus)

Ad 2 — Pain Point Angle · "Stop Doing It Manually." · Targets Solopreneurs (Sandra)

Ad 3 — Urgency/FOMO Angle · "Your Clients Are Asking About AI Agents. Do You Have an Answer?" · Targets Agency Owners (David)

### **Ad Best Practices Applied**

Hook in first line — stops the scroll in 0.5 seconds (authority, pain, or competitive pressure)  
Short copy — 5–6 lines max, no walls of text, mirrors real high-performing Meta ads  
Bold visual contrast — dark background, large text overlay, brand colors consistent across all 3  
One CTA — one link, one action per ad (Register Free / Save My Seat / Register Now)  
Specific details — real dates, real numbers, real credentials = more trust than generic claims  
Each ad presented as realistic Facebook post mockup with engagement numbers and action buttons

## **4.2 — Day 1 Webinar Presentation (Gamma)**

A 9-slide Day 1 webinar deck built in Gamma — this is the actual slide deck Nuno would show on screen during the live session on April 27th. Dark theme with cyan/magenta accents matching the funnel design system.

### **Slide structure:**

- Slide 1: Title — Welcome to Day 1 · Build Your First AI Agent. Live. From Scratch.
- Slide 2: Who is Nuno Tavares — 25 years, 6-figure agency, 3x HL Award, 10K+ students
- Slide 3: 3 Days. 3 Transformations — full agenda for Days 1, 2, and 3
- Slide 4: What Is an AI Agent? — plain English, no buzzwords, real dinner table example
- Slide 5: Why Manus AI? — direct comparison vs ChatGPT, Zapier, and a VA
- Slide 6: What We're Building Today — Lead Follow-Up Agent, 45 minutes, skill level zero
- Slide 7: Step 1 — Create Your Manus Account at manus.im (2 minutes, free)
- Slide 8: What You Just Built — celebration moment mapped to each ICP's business outcome
- Slide 9: Day 2 Preview + Q&A — tomorrow's teaser, VIP plug, closes with "Let's freakin' go"

## **Task 5 — Loom Video Presentation**

Date: April 15, 2026 | Deadline: 11:59 PM ART

2-minute Loom video presenting the complete project to Nuno Tavares covering:

- Strategy overview — why this funnel, this offer, and these automations
- Live walkthrough of all 3 funnel pages (landing, VIP, thank you)
- GHL pipeline and workflow overview
- Facebook ads and Day 1 deck
- Expected impact and next steps

## What I Would Bring to the Table as Nuno's EA

I would build a simple **Manus AI agent** (fitting the theme perfectly) that answers common pre-webinar questions automatically:

- "When does it start?"
- "Where's my Zoom link?"
- "How do I create a Manus account?"
- "What's the difference between free and VIP?"

This reduces the support load on Nuno's team before April 27th and creates a live demo of exactly what attendees will learn to build.

### A WhatsApp or SMS Reminder Sequence

Email deliverability in shared environments is unreliable — we already saw this. I would add a parallel SMS or WhatsApp sequence inside GHL with 3 key touch points:

- April 25: "We go live in 48 hours"
- April 27 at 2 PM: "We go live in 1 hour — here's your Zoom link"
- April 28 at 2 PM: "Day 2 starts in 1 hour"

Open rates for SMS are 98% vs ~20% for email. This would dramatically increase attendance.

## Project Summary

### What Was Built in 4 Days

- ✓ 3 live funnel pages deployed on Lovable (landing, VIP, thank you)
- ✓ 3 GHL automation workflows (free registration, VIP purchase, remarketing)
- ✓ 5-stage CRM pipeline in HighLevel
- ✓ 12 emails written in Nuno's voice — formatted, sequenced, and tested
- ✓ 3 Facebook ad mockups (authority, pain point, urgency angles)
- ✓ Day 1 webinar slide deck built in Gamma
- ✓ NT logo and VIP pass card created
- ✓ All workflows tested end-to-end in GHL shared sub-account
- ✓ Full ClickUp project tracking (70+ tasks across 5 milestones)
- ✓ 3-layer documentation system: research doc, process log, final presentation
